

Call for Papers

IEEE Transactions on Plasma Science Special Issue on Plenary, Invited, Workshop on Pulsed Power for Fusion from PPPS-2025

The IEEE Transactions on Plasma Science invites all attendees of the 25th IEEE Pulsed Power Conference (PPC) and the 52nd IEEE International Conference on Plasma (ICOPS) to submit your manuscripts to a Special Issue dedicated to this joint conference. The objective of this Special Issue is to provide the widest possible distribution of archival quality papers detailing up-to-date developments reported at PPC/ICOPS 2025. Contributions to the Special Issue will undergo the same rigorous review standards as typical for all IEEE Transactions and Journals.

IEEE policy requires that a manuscript submitted to the Special Issue must be significantly revised and lengthened from that published on the conference proceedings. Every submission to the Special Issue will undergo an automatic plagiarism check by comparing with articles previously published elsewhere.

This Special Issue is open to, but not limited to, all attendees of PPC/ICOPS 2025. The IEEE website at

<https://iee.atyponrex.com/journal/tps-ieee>

will be used for electronic manuscript submission. Papers should be submitted to the website no later than **October 1, 2025** in order to complete the review process in time for the April 2026 publication date.

Authors may seek additional information by contacting any one of the following Guest Editors.
